Re: Perk Chemical Company
Elizabeth, New Jersey

Dear Sir:

The Hazardous Waste Site Investigation Program of the U.S. Environmental Protection Agency (EPA) investigates hazardous waste sites. Our Task Force is responsible for monitoring and maintaining current status of all hazardous waste sites in Region II. One site is the Perk Chemical Company located at 217 First Street in Elizabeth, New Jersey. Our Emergency Response Unit visited the Perk property on September 13, 1979. While no immediate environmental hazard from this facility was found, there may be occupational danger for personnel involved in routine operations on the premises. To complete our file, please provide us with recent inspection report or summary or other information you may have on this establishment and send to my attention Room 812 at the above address. Your cooperation is very much appreciated.

Sincerely yours,

George B. Radan
Environmental Scientist
